

## Special Issue

# Multiple Sclerosis and Demyelinating Disease: Clinical Treatment and Management

### Message from the Guest Editor

The Special Issue *“Multiple Sclerosis and Demyelinating Disease: Clinical Treatment and Management”* invites submissions that explore advances in the diagnosis, treatment, and long-term care of multiple sclerosis (MS) and related demyelinating disorders. Despite significant progress in immunology, neuroimaging, and therapeutic development, these conditions continue to present substantial clinical challenges. We welcome high-quality original research articles, reviews, and meta-analyses focusing on disease-modifying therapies, emerging immunological and neuroprotective strategies, symptom management, rehabilitation, cognitive and psychological support, and multidisciplinary care models. Equally important are studies exploring the use of biomarkers, imaging, and digital health tools to improve diagnosis, prognosis, and monitoring. This Special Issue aims to foster critical discussion and disseminate evidence that will inform future therapeutic strategies and improve patient outcomes in multiple sclerosis and demyelinating disease.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
