Special Issue

Treatment and Prognosis of Spinal Surgery

Message from the Guest Editors

The landscape of spinal surgery is continually evolving, with significant advancements in both treatment modalities and prognostic paradigms. Advancements in operative approaches, such as with minimally invasive techniques (MIS), intraoperative navigation, and robotassisted surgery have revolutionized treatment paradigms, although further longitudinal, high-quality data are required to substantiate these applications. We therefore invite submissions that assess the efficacy of various operative strategies in the context of clinical and patient-reported outcomes (PROs) following spinal surgery. This issue seeks to provide a comprehensive overview of the current state and future directions in the field, offering insights into both established and emerging treatments for optimizing patient care. We welcome original research articles and reviews that contribute to the further understanding of contemporary treatment paradigms and prognostic indicators for patients undergoing spinal surgery. We look forward to your valuable contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
