Myocarditis and Pericarditis: Clinical Advances and Current Challenges

Message from the Guest Editors

Pericarditis and myocarditis are at the forefront of cardiovascular research and clinical attention. These inflammatory cardiac conditions span a diverse range of etiologies—from idiopathic and viral to autoimmune and immune-mediated causes, including those related to cancer immunotherapies.

This Special Issue is dedicated to exploring the clinical advances and persistent challenges in the fields of pericarditis and myocarditis. It brings together a curated collection of original studies, comprehensive reviews, and expert insights addressing key developments in diagnosis, risk stratification, imaging, and treatment strategies.

The issue aims to provide clinicians, researchers, and trainees with an updated, practical framework to approach these conditions. We hope the content will foster greater awareness, early recognition, and multidisciplinary management to improve patient outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
