Clinical Debates in Minimally Invasive Glaucoma Surgery (MIGS)

Message from the Guest Editor

Minimally invasive glaucoma surgeries (MIGSs), applied in cases of mild to moderate glaucoma, have gained increasing popularity in recent years because of their efficacy in reducing intraocular pressure, safety profile, simplicity of technique, and reduced risk of vision compromise. While various types of MIGS exist, differing in techniques, indication, outcome, and complications, these variations remain poorly elucidated. Moreover, the existing body of histopathological studies is insufficient for a comprehensive understanding of post-surgical wound healing. Consequently, debates persist among researchers regarding the mechanism by which MIGS reduces intraocular pressure, as well as differing opinions on whether the surgical technique impacts outcomes and the factors influencing surgical success.

Keywords:

- MIGS (minimally invasive glaucoma surgery)
- schlemm's canal opening surgery
- trabeculotomy
- trabeculectomy
- collector channel
- histology
- intraocular pressure
- surgical success

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
