Advances in Diagnosis and Treatment of Esophageal Diseases

Message from the Guest Editor

In recent years, there have been remarkable advances in the diagnosis and treatment of esophageal diseases. In malignant diseases, endoscopic diagnosis (diagnosis using image-enhanced endoscopy or AI-assisted diagnosis), endoscopic treatment, robotic surgery, etc., and in benign diseases, techniques such as POEM for esophageal achalasia, diagnosis and treatment of eosinophilic esophagitis, endoscopic treatment of Zenker's diverticulum, or endoscopic resection of esophageal SMT, etc., have been developed. While the level of technical difficulty has increased, there have been advances in the technology and equipment used to overcome these difficulties. This Special Issue aims to deliver dedicated knowledge on the latest advancements in endoscopic diagnostic methods and therapeutic techniques. Endoscopic innovations in a wide range of fields are particularly welcomed.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
