Liver Transplantation: Current Management and Future Options

Message from the Guest Editors

Liver transplantation is a life-saving procedure for patients with end-stage liver disease and several malignancies. Over the years, significant advancements have been made in liver transplantation, leading to improved outcomes and expanded eligibility criteria. In terms of current management, the success of liver transplantation relies on several key factors. These include appropriate donor selection, meticulous surgical techniques, tailored immunosuppressive regimens, and comprehensive post-transplant care. Organ allocation systems have evolved to prioritize patients based on the severity of illness, ensuring the equitable distribution of available organs. Surgical approaches have become more refined, with advancements such as living donor liver transplantation and split liver transplantation expanding the donor pool and reducing waiting times. Continued research and innovation in liver transplantation are essential in order to overcome challenges, enhance patient care, and save more lives. Therefore, researchers in liver transplantation are encouraged to submit their findings as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
