Oral and Maxillofacial Surgery: Diagnosis, Management and Future Opportunities

Message from the Guest Editor

Maxillofacial surgery has expanded its fields of interest in recent decades from traumatology to head and neck oncology, from preprosthetic surgery to reconstructive microsurgery, from malformative surgery to endoscopy of paranasal sinuses and skull base, covering a wide spectrum of problems and sectoralizing in each specific area. Huge steps forward have been made in every area, from diagnosis to treatment. Multidisciplinary work and collaboration with different specialists, oncologists, radiotherapists, radiologists, pathologists, dentists, ophthalmologists, ENT specialists, and dermatologists, has become common clinical practice, leading to a substantial improvement in results. The aim of this Special Issue is to discuss these innovations and future opportunities in the different areas of interest of maxillofacial surgery in the form of original articles, reviews, or in other forms.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
