# Current Updates on Functional Endoscopic Sinus Surgery for Chronic Rhinosinusitis

### Message from the Guest Editors

We warmly invite you to submit your work to our forthcoming Special Issue, "Current Updates on Functional Endoscopic Sinus Surgery for Chronic Rhinosinusitis". This edition will focus on the latest progress in endoscopic and image-guided procedures that are revolutionizing the treatment landscape for chronic rhinosinusitis (CRS). Minimally invasive techniques continue to redefine clinical approaches by enhancing patient outcomes, shortening recovery periods, and lowering complication rates. As innovation accelerates in this field, there is an increasing need to compile recent breakthroughs, practical insights, and evidence-based methodologies. We welcome original research articles that examine surgical methods, cutting-edge technologies, and collaborative treatment models in CRS management. Your submission will contribute to an essential body of knowledge supporting physicians, researchers, and surgeons working to improve care for CRS patients. We look forward to your important contribution to this Special Issue.
