Updates on Diabetic Foot Osteomyelitis

Message from the Guest Editors

Diabetic foot osteomyelitis (DFO) is the most frequent infection associated with diabetic foot ulcers, occurring in >20% of moderate infections and 50–60% of severe infections, and is associated with high rates of amputation. Any professional who manages DFO must bear in mind that it is a disease that has several clinical presentations, and therapy will be influenced mainly by the presence of both soft-tissue and necrotizing infections, vascular disease, and ulcer location. Unfortunately, there are few high-quality clinical trials that stratify clinical presentations of DFO or compare different options of treatments in this type of infection. The current Special Issue of *JCM* invites clinical researchers to contribute original research manuscripts and review articles that discuss some challenges regarding DFO diagnosis (the role of clinical inflammatory signs, probe-to-bone test, plain X-rays, MRI, laboratory tests) or treatment options (duration of medical treatment, medical treatment versus surgical treatment, choice of proper surgical treatment, or the role of adjuvant therapies). We look forward to receiving your submission.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
