Comprehensive Approaches in Gastrointestinal Oncology: Focus on Colorectal, Gastric, and Pancreatic Cancer Treatment

Message from the Guest Editors

Gastrointestinal oncology increasingly relies on a translational framework that connects molecular discoveries to clinical decision-making. Particularly, in colorectal, gastric, and pancreatic cancer, a coordinated multidisciplinary and translational strategy represents the most effective road to improving patients' prognosis. Preclinical findings are rapidly translated into clinical trials with a biomarker-driven approach, converting biological complexity into personalized therapeutic strategies. Certainly, the complexity of these topics requires a lot of different competencies. International collaborations lead to the definition of guidelines and enable data sharing across diverse populations. Scientific publishing diffuses knowledge and in turn stimulates new research and new projects. This Special Issue aims to present and disseminate the most recent advances related to the management of colorectal, gastric, and pancreatic cancer. We consider contributions addressing translational research with clear clinical implications, new insights about staging modalities and multidisciplinary and multimodal treatment strategies, and future perspectives of surgical approaches.

Guest Editors

Dr. Stefano Rausei

General Surgery Unit, Department of Surgery, Cittiglio-Angera Hospital, ASST SetteLaghi, 21100 Varese, Italy

Dr. Georgios D. Lianos

Department of Surgery, University of Ioannina, Ioannina, Greece

Deadline for manuscript submissions

15 October 2026

About the Journal

Message from the Editor-in-Chief

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
