Advances in the Surgery, Clinical and Rehabilitation Management of Orthopedic and Trauma Patients

Message from the Guest Editors

Orthopedic and trauma disorders are widely reported in the adult and elderly population. In the orthopedic field, diseases of bone and soft tissue are frequently encountered in common clinical practice. From a trauma perspective, fractures and dislocations are also frequent, as are capsuloligamentous injuries. Some of these have evidence-based treatments in the literature. In other cases, off-label procedures are performed with the absence of physical therapy protocols in the effort to generate innovations. The aim of this Special Issue is to share the knowledge and experience of groups and authors currently working on orthopedic and trauma disorders solutions, their impressions regarding new therapeutic strategies, the results obtained, and the problems that have arisen. The topic of this Special Issue is treatment 2.0; all this can be achieved through valid research articles that prove to be of high impact and interest to the orthopedic community. Note that case reports and short reviews will not be accepted.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès
