

## Special Issue

# Clinical Management of Rectal Cancer

### Message from the Guest Editor

The modern treatment of advanced rectal cancers includes the combination of the best aspects of surgical, medical and radiation oncology options. Over the last 20 years, the technical and medical development in these different treatment fields has been huge. Total neoadjuvant therapy for locally advanced rectal cancer has been shown to reduce distant failure. Robotic low anterior resection may provide potential advantages in terms of postoperative outcome and long-term functional outcome, but more evidence is needed to confirm these results. There is growing evidence that the selective use of neoadjuvant treatment in cT3 rectal cancer based on the circumferential resection margin on MRI is associated with low local recurrence rates and beneficial long-term results. In this Special Issue, the focus will be on the results of multimodality treatments for advanced rectal cancer, taking into consideration modern surgical techniques such as robotic surgery. Of particular interest will be papers comparing the early postoperative outcome, the oncology outcome, the rate and management of complications, and the quality of life achieved using different treatments.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
