# Application of Radiological Imaging: Diagnosis, Therapy Monitoring and Pathophysiology in Oncology

### Message from the Guest Editor

In recent years, there has been extensive research regarding imaging of oncologic diseases. The role of imaging has rapidly evolved from sole detection and measurement of malignant lesions to prognostication, treatment prediction and prediction of histologic features of tumors.

From this, a novel field has emerged: Radiomics, which can aid in all of different clinical aspects of oncologic imaging. Due to the advent of artificial intelligence in imaging research and even in clinical routine, the field of oncologic imaging will be significantly improved. The advent of hybrid imaging with PET-CT and PET-MRT helps to better characterize tumors in a morphological and functional way.

Thus, cutting-edge studies utilizing these novel techniques have shown promising results in various tumors where imaging can aid in several different aspects of oncology.

In this Special Issue, we aim to highlight recent advances in the context of diagnosis, therapy monitoring, and the prediction of prognosis in the field of oncology. Papers investigating these novel aspects of oncologic imaging are welcomed in this Special Issue.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
