Association between Restless Leg Syndrome (RLS) and Major Diseases: Current Research and Outlook

Message from the Guest Editor

Restless leg syndrome or Willis–Ekbohm disease (RLS/WED) is a highly prevalent medical condition. From an etiological point of view, it is usually classified as primary (idiopathic) or secondary. In recent years, many studies have addressed the role of genetic factors and the neurochemical features of idiopathic RLS/WED. However, less attention has been paid to secondary cases of this disease. For this reason, we think that the elaboration of a Special Issue on the association between RLS/WED and major (mainly systemic) diseases could be interesting, especially for general practitioners and physicians specialized in Internal Medicine. In this Special Issue, we will focus on the current knowledge of many diseases that could be associated with or increase the risk of suffering from RLS/WED.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
