

Topical Collection

Recent Advances in Retina Surgery

Message from the Collection Editor

On behalf of the Journal of Clinical Medicine Editorial Team, I am delighted to present a Special Issue on the topic “Recent Advances in Retina Surgery”. In recent years, we can report numerous improvements in the management of vitreoretinal disorders. Therapeutical approaches have undergone a profound evolution thanks to a continuous implementation of the diagnostic and surgical instrumentations, and some new surgical technique for the management of advanced retinal pathologies such as inherited retinal diseases, advanced age-related macular degeneration, ocular cancer and vitreomacular diseases. This Special Issue aims at creating a multidisciplinary forum of discussion about the role of surgical procedures in different retinal pathologies. The published papers will describe new developments in these areas. This Special Issue accepts high-quality articles containing original research results as well as review articles of exceptional merit.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
