

Special Issue

Management, Pathogenesis, and Treatment of Rhinosinusitis

Message from the Guest Editor

Rhinosinusitis is a very common condition, presenting with different clinical phenotypes and molecular endotypes. Pathogenesis is not fully understood, and neither is the interplay between nasosinusual inflammation and systemic comorbidities, including lower airway disease. In recent decades, bacterial biofilm and impairments in respiratory microbioma have been considered to be among pathogenic factors. The effectiveness of conventional (medical or surgical) treatment is not completely predictable, and personalised treatment focusing on biological, anatomic, and microbiological characterization could be more effective. For an upcoming Special Issue in the *Journal of Clinical Medicine* (PubMed indexed), we invite authors to contribute articles focusing on the diagnosis, treatment, and pathogenesis of rhinosinusitis in both adult and pediatric patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
