

## Topical Collection

# New Techniques in Robotic Surgical Management of Mitral Valve Repair

### Message from the Collection Editors

Robotic cardiac surgery was developed to offer the least invasive approach to managing a diverse array of cardiac conditions. It now encompasses mitral valve surgery, coronary revascularization, arrhythmia surgery, pacing lead implantation, congenital cardiac operations, cardiac tumour resections and diaphragmatic pacing. However, the adoption of robotic technology in the current clinical practice is not as widespread as initially anticipated, due to several negative drivers and constraints. There is a lack of robust evidence and a paucity of information from randomized controlled trials to support the wider application of robotic interventions within the current surgical climate.

The future of robotic cardiac surgery depends on a united multidisciplinary dialogue between patients, cardiologists and surgeons to deliver these innovative procedures for appropriately selected individuals, with the primary aim of delivering the highest quality of care for cardiac patients.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
