Endoscopic Management of Hepato-Pancreato-Biliary Disease

Message from the Guest Editors

Advances in biliopancreatic endoscopy have been enormous in recent years. While it seemed that ERCP was losing its diagnostic facet with the advent of echoendoscopy, the emergence of cholangioscopy has recovered and complemented echoendoscopy in the optical diagnosis of intraductal biliary or pancreatic lesions. In addition, cholangioscopy has extended the therapeutic options of ERCP, allowing for access or treatment that was not possible before. On the other hand, therapeutic endoscopic ultrasound has opened up the possibility of treating biliopancreatic pathology that cannot be treated by ERCP, either by accessing the bile duct, draining it, or creating enteroanastomoses, opening up an infinite number of therapeutic options that were previously inaccessible in many cases. Although this therapy has traditionally been reserved for malignant or palliative pathology, some of these endoscopic interventional procedures may have a place in the treatment of benign pathology in the future. For this Special Issue, we welcome authors to submit papers on clinical advances in biliary and pancreatic endoscopy in terms of both diagnosis and treatment.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
