New Perspectives of Gastric Cancer: Current Treatment and Management

Message from the Guest Editor

Gastric cancer remains a significant challenge in the healthcare system. Today, complex treatment methods have become standard practice. We now have extensive data on gastric cancer treatment outcomes. However, most of these data originate from Eastern countries, making it difficult to directly apply these results to Western populations. We conducted a retrospective analysis of medical records from patients admitted to the Department of Surgery at the Hospital of the Lithuanian University of Health Sciences, Kaunas Clinics, focusing on those diagnosed with gastric cancer. The analysis examined the impact of systemic treatments (neoadjuvant and adjuvant chemotherapy), HIPEC, and surgical techniques (open and laparoscopic) on patient survival and early and late postoperative complications. This Special Issue invites contributions from researchers and clinicians to explore the latest findings in this critical area. We encourage the submission of original research, reviews, and clinical studies that delve into gastric cancer. We look forward to receiving your valuable contributions to this *Special Issue*.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
