Recent Developments in Urinary Incontinence

Message from the Guest Editor

Urinary incontinence remains a prevalent and impactful condition across all age groups, significantly affecting quality of life and posing complex challenges in both diagnosis and treatment. In recent years, remarkable advances have emerged in our understanding of its pathophysiology, as well as in diagnostic technologies, conservative therapies, and surgical innovations. From novel pharmacological agents and regenerative therapies to sophisticated urodynamic tools and minimally invasive surgical techniques, the field is rapidly evolving. Additionally, digital health solutions, such as wearable sensors and app-based pelvic floor training, are reshaping patient-centered care and long-term management strategies. This Special Issue aims to highlight the latest clinical research in relation to urinary incontinence. We welcome original research articles, comprehensive reviews, and clinical studies focusing on recent progress in diagnosis, treatment innovations, patient outcomes, and multidisciplinary approaches to care. We look forward to your valuable contributions to advancing knowledge and practice in this important area of urology and pelvic health.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
