

Special Issue

Current Challenges in Oral and Maxillofacial Surgery

Message from the Guest Editors

The field of oral and maxillofacial surgery is continuously evolving, driven by technological innovation, improved diagnostic protocols, and multidisciplinary treatment strategies. This Special Issue aims to highlight recent clinical advances and evidence-based practices in oral and maxillofacial surgery, encompassing areas such as surgical management of oral pathologies, craniofacial trauma, orthognathic surgery, reconstructive techniques, and minimally invasive approaches. Topics will also include integration of digital technologies, 3D printing, and virtual surgical planning, as well as postoperative management and complications. Contributions are welcome from clinical studies and reviews that provide new insights to improve patient care, functional outcomes, and quality of life.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
