Interventional Pulmonology: Advances and Future Directions

Message from the Guest Editors

Interventional pulmonology integrates advanced techniques and tools to diagnose and treat a wide range of pulmonary disorders using minimally invasive methods. Over the past few decades, interventional pulmonology has experienced an extraordinary evolution, facilitated by the integration of technological advances with the clinical decision-making process of clinicians, enabling a patient-centered diagnostic and therapeutic approach. This Special Issue aims to explore the latest technological innovations and their clinical applications within the field of interventional pulmonology. Topics of interest for publication include, but are not limited to, the role of interventional pulmonology in lung cancer screening, the diagnosis of peripheral lung nodules, mediastinal staging, airway stenting, and the potential therapeutic role of endoscopic techniques. We welcome original research and comprehensive reviews that showcase the recent advances in these areas. By highlighting recent progress, this Special Issue seeks to provide clinicians and researchers with a comprehensive overview of the current state and future potential of interventional pulmonology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
