Implant Dentistry: New Challenges and Complication Management

Message from the Guest Editor

Modern implantology has overcome the times when early and delayed implant placement and loading, extending the overall treatment time, were the usual therapeutic approaches. It has also overcome the times when implant positioning was not essential, soft tissue managing was not critical, and when conventional impressions and metal–ceramic restorations represented the standard workflow in implant dentistry. The development of new products and the application of new technologies based on new scientific evidence have led to new standards of success, a reduction in complications, the facilitation of clinical procedures, and improvements in the well-being of our patients. New treatment proposals through 3D planning and navigation surgery and new implant designs and their prosthetic solutions offer clinicians a dental implant solution that entails a reduction in chair-time, the simplification of clinical procedures even in critical situations, better respect for the surrounding tissues.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
