Special Issue

Current Challenges and Future Directions in Lung Resections in Thoracic Surgery

Message from the Guest Editors

The evolution in the practice of thoracic surgery has been astonishing during the last decade. Many new technologies and modalities have been rolled out to everyday practice, constituting surgical treatment possible in more patients and in pathologies that previously were not amendable to treatment. Some examples include the utilization of robotic platforms in minimally invasive approaches, the evolution of lung volume reduction interventions in the form of surgery. valves, or hybrid procedures, the increasing performance of sublobar anatomical lung resections in lung resections, the implementation of screening services for lung cancer, the utilization of artificial intelligence in the research and clinical practice of thoracic surgeons, the application of 3D reconstructions and marking of lesions in lung resections, the implementation of targeted therapy as multimodal treatment in lung cancer, and many others. We welcome authors to submit manuscripts that provide a comprehensive connection between present challenges and future directions in thoracic surgery with the implementation of the abovementioned evolutionary new developments within the specialty.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
