Innate Immunity in Overdrive: Novel Insights into Autoinflammatory Syndromes

Message from the Guest Editor

Autoinflammatory diseases (AIDs) are disorders of innate immune dysregulation, causing recurrent or chronic inflammation without high-titer autoantibodies or antigen-specific T cells. They include monogenic syndromes, such as familial Mediterranean fever, and multifactorial conditions like adult-onset Still's disease and Behçet's disease. Advances in genetics and immunology have clarified roles of inflammasomes and cytokines (IL-1, IL-18, TNF). International registries now provide real-world insights into epidemiology, outcomes, and prognosis. A major breakthrough is VEXAS syndrome, identified in 2020, caused by somatic UBA1 mutations and marked by systemic inflammation and hematologic abnormalities, illustrating the "genotype-first" approach. This Special Issue will discuss recent progress and its impact on diagnosis, biomarkers, precision medicine, and treatment strategies. Targeted therapies, especially IL-1 and IL-6 inhibitors, have already changed care, with more advances expected through personalized approaches.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
