

## Special Issue

# Advances, New Technologies and Optimization of Reverse Shoulder Arthroplasty

### Message from the Guest Editors

Reverse shoulder arthroplasty (RSA) has become the mainstay of shoulder arthroplasty in the 21st century and is considered the most important breakthrough and innovation in upper limb arthroplasty in the last 50 years. This Special Issue aims to provide an overview of the new “tools” available on the market and present advances in soft tissue and scapulothoracic integration, as well as biomechanics and clinical results. We are looking forward to receiving your contributions to advance our understanding and knowledge in these fields.
