

Special Issue

Advances, New Technologies and Optimization of Reverse Shoulder Arthroplasty

Message from the Guest Editors

Reverse shoulder arthroplasty (RSA) has become the mainstay of shoulder arthroplasty in the 21st century and is considered the most important breakthrough and innovation in upper limb arthroplasty in the last 50 years. This Special Issue aims to provide an overview of the new “tools” available on the market and present advances in soft tissue and scapulothoracic integration, as well as biomechanics and clinical results. We are looking forward to receiving your contributions to advance our understanding and knowledge in these fields. Please find more information on the scope of this special edition under the following link:

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
