Special Issue

Sarcopenia in Older Adults

Message from the Guest Editor

"Sarcopenia" describes the age-related decline in skeletal muscle mass and function which has been associated with increased risk for disability, loss of independence, falls and mortality in older adults. In the past decade, several consensus groups have developed operational definitions of sarcopenia in an effort to increase clinical attention to this condition, and the assignment of an ICD-10-CM code in 2016 may be an important step in achieving this goal. Nevertheless, there remains substantial conjecture in the research literature, and subsequent confusion among clinician colleagues, regarding appropriate operational definitions, measurements and thresholds for sarcopenia. Furthermore, the causes and consequences of sarcopenia are multifactorial and appear to differ according to the definition applied.

- Aetiology of sarcopenia
- Lifestyle and pharmacological interventions for sarcopenia
- Novel techniques for assessment of sarcopenia
- Sarcopenia consequences according to different operational definitions
- Integrating sarcopenia case-finding into clinical practice
- Sarcopenia in specialised populations (eg. Type 2 diabetes)
- Health economics of sarcopenia

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
