

## Special Issue

# Secondary Osteoporosis and Metabolic Bone Diseases

### Message from the Guest Editor

There is ample evidence that patients with various organ dysfunction have an increased risk of bone fragility and fractures. Osteoporosis is not only influenced by low bone volume and mass but also by poor microarchitecture and tissue quality. More emphasis has been given to the quantitative rather than qualitative assessment of bone health, both in primary and secondary osteoporosis. Bone mineral density (BMD) is an incredibly useful clinical tool in assessing bone strength, but it may underestimate the fracture risk in patients with secondary osteoporosis. Serum and urinary bone biomarkers have been found to be reflective of bone activities and predictive of fractures independently of BMD. By utilizing new technologies such as innovative biomarkers and high-resolution images, we can better assess the bone health and fracture risk. Moreover, invasive assessments such as bone histology and micro-indentation are great counterparts.

This issue focuses on the current and future directions of bone health and management in patients with secondary osteoporosis and various metabolic bone diseases.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
