Sepsis Management in Anesthesia and Intensive Care

Message from the Guest Editor

Anesthesia and intensive care have evolved significantly over recent decades, yet the management of patients with sepsis remains challenging due to the diminished physiological reserves and comorbidities, systemic response to surgery or other invasive procedures, administration of anesthetics and mechanical ventilation.

Therefore, this Special Issue in the Journal of Clinical Medicine aims to publish contributions from distinguished authors whose findings have the potential to significantly improve the management of septic patients throughout the continuum of severity ranging from sepsis to septic shock.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
