

## Special Issue

# Treatment and Prevention Strategies for Skin Cancer

### Message from the Guest Editors

Skin cancer is the most common malignancy worldwide. There were over 77,000 new cases of melanoma diagnosed in the United States from 2012 to 2016. Nonmelanoma skin cancer (NSMC) is even more prevalent, with estimates of over 5.4 million new cases and over 3.3 million people treated in 2012. The rising incidence is attributed to aging population trends, increased cumulative UV exposure over lifetime, and immunosenescence. It is a public health concern as it is the fifth most costly cancer to treat. As we approach a greater understanding of its pathophysiology, a number of new therapies have emerged, including targeted treatments and immunotherapy. However, the prevention of skin cancer remains imperative, our current understanding being that the environmentally driven UV component of sunlight is the major risk factor. In this Special Issue, we hope to elucidate new treatment and prevention strategies for skin cancer.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
