

Special Issue

Novel Imaging Techniques in Skin Diseases

Message from the Guest Editors

The area of non-invasive diagnosis of skin disease is a constantly expanding field of research. The development of novel diagnostic devices allows in vivo and ex vivo tissue imaging, refining the management of the patient in a diagnostic bench-to-bed-side approach. At present, the complexity of inflammatory and the tumoral diseases has been investigated by several researchers, but many other findings and observations are yet to be discovered and demonstrated. In addition to the study of skin diseases, the objective assessment of normal aging processes and of their improvements, which can be induced by several therapeutic procedures (including aesthetics), are still at the beginning of a long and fertile path. The present Special Issue aims to increase our knowledge of the physiological and pathological skin processes, analyzed with the eye of the novel imaging techniques that are currently available or under development. In summary, this is a great opportunity to expand our understanding of the skin and of the new technological devices that will become more important for everyday clinical practice.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
