Sleep Disorders: Latest Advances and Prospects

Message from the Guest Editor

The field of sleep medicine encompasses numerous intertwined disorders and syndromes related to psychiatry, neurology and internal medicine. Sleep disorders, as different and divergent as they seem, do have, however, some common ground. One of these is a relatively prevalent symptom of daily sleepiness. Another is the disruption of clock gene regulation or nocturnal hypoxemia, acting through a potent transcription factor—HIF-1 α —affecting various metabolic pathways and implicated in serious complications of metabolic syndrome. Moreover, disrupted sleep, independently of the underlying disorder and metabolic derangements, has been posited as a risk factor for cardiovascular diseases. The treatment of sleep disorders also illustrates the diversified nature thereof, from behavioral interventions and medications to CPAP devices; from causal to merely symptomatic ones; from success to frustrating failure. Furthermore, disrupted sleep is recognized in many chronic afflictions. I strongly encourage and invite all the researchers engaged in this interdisciplinary area to contribute to this Special Issue devoted to sleep disorders.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
