Sleep Disorders: From Clinical Research to Daily Practice

Message from the Guest Editors

Recently, there has been significant progress in the understanding of the pathophysiology underlying some sleep disorders, such as restless legs syndrome (RLS) and REM sleep behaviour disorder (RBD), especially their electrophysiological basis and the possibility to non-invasively neuromodulate them.

Gaining novel insights into the complex interactions between central and peripheral neural circuits in the generation of symptoms of RLS is mandatory for a better diagnostic refinement. Further insight is provided by the effectiveness of some non-pharmacological tools, such as transcranial magnetic stimulation, transcranial direct current stimulation, and transcutaneous direct spinal stimulation, thereby extending the therapeutic arsenal.

In this Special Issue, we focus on the neurophysiological correlates of sensory-motor network involved in RLS and the cortical-brainstem connections implicated in RBD in order to provide new translational insights into their pathophysiological mechanisms and to guide new pharmacological and non-pharmacological treatments.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
