

## Special Issue

# Current and Emerging Uses of Statins in Clinical Therapeutics

### Message from the Guest Editor

Statins are one of the most sold drugs worldwide. Atherosclerosis is a major risk factor for cardiovascular disease (CVD), and statin therapy is used in the prevention of CVD. Statins are usually well tolerated, but some adverse effects are seen. One of the most common adverse-effects is muscle pain ranging from myalgia to rhabdomyolysis. In 2012, the US Food and Drug Administration (FDA) added to the safety labels of statins that a potential increased risk of elevated blood glucose concentrations and a new-onset of diabetes were observed with statin treatment. The mechanisms behind these adverse effects are unknown. This Special Issue from *Journal of Clinical Medicine* will focus on the use of statins clinical therapeutics and the adverse effects seen with statin treatment.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
