Sudden Cardiac Death: Role of Multimodality Imaging in Risk Stratification

Message from the Guest Editors

Sudden cardiac death (SCD) is the most common cause of cardiovascular death averaging 300–400,000 deaths in the United States annually. From a pathophysiological point of view, SCD is the result of a predisposing substrate upon which a trigger acts, resulting in a lethal ventricular arrhythmia. In the broad spectrum of cardiovascular disease which can cause SCD (including cardiomyopathies, myocarditis, valvulopathies, and primary electrical disorders) the most common underlying cause of SCD is myocardial infarction related scar leading to ventricular tachyarrhythmia. This special issue aims to review the last technical advances in the field of cardiovascular imaging to improve patient's risk assessment for SCD and to discuss the challenges that the cardiovascular imager may face. About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
