Surgical Management of Gynaecological Cancer

Message from the Guest Editor

Gynaecological surgical oncology as a subspecialty has broadened significantly. The radicality of surgery has increased for some gynaecological cancers such as advanced ovarian cancers and training curriculums now include performing upper abdominal surgeries such as splenectomy and diaphragm peritoneal stripping. The route of surgery for cervical cancer has changed in view of the LACC trial where abdominal access was shown to be safer than robotic and laparoscopic access.

However, minimal access surgery is still the recommended route for early stage endometrial cancers. The robotic surgery vs. laparoscopic surgery debate continues. The use of advanced technology such as the sentinel lymph node identification using the Gamma camera in vulval cancer and the Indocyanine Green (ICG) infrared fluorescence in endometrial and cervical cancer is claimed to reduce postoperative morbidity with no compromise in survivorship. Fertility-preserving surgery has become a safe and efficient option for many young gynaecological cancer patients. Research and review articles evaluating different surgical approaches and modalities in all aspects of gynaecological oncology will be welcomed.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
