Surgical Management of Vitreoretinal Diseases

Message from the Guest Editor

Vitreo-retinal surgery has experienced great advances and innovations in recent years, such as the standardization of small-incision sutureless systems; the expansion of non-contact viewing systems; the development of new surgical tools, lenses, and vitrectomy machines; and more recently, the use of 3D-viewing systems, intraoperative optical coherence tomography (OCT), and surgical robots. As in every fast-evolving surgical field, these advances are often difficult to spread, validate, and benchmark in a clinical research setting. This Special Issue aims to select original research papers and review articles that discuss the current state-of-the-art, address existing knowledge gaps, and present clinical outcomes of such advances in modern vitreo-retinal surgery, focusing on their clinical impacts on the management of vitreo-retinal diseases.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
