Parkinson's Disease: Diagnosis, Treatment, and Management

Message from the Guest Editor

Neurodegenerative disorders are very common in aged people, which severely affect their quality life as well as that of their caretakers. Parkinson's is one of the most common diseases in aged populations after Alzheimer's disease. More than 10 million people have Parkinson's around the globe. However, each year, more than 90,000 patients are diagnosed with PD alone in United States only. Incidences of Parkinson's increases with age, mostly 65 years or older. Parkinsonian symptoms include motor (tremor, muscle stiffness, impaired balance, and coordination) as well as non-motor symptoms (speaking, swallowing, chewing, constipation, etc.). With disease progression and duration of treatment drugs, response also decreases, which results into very serious conditions for patients as well as for their caretakers. This Special Issue will focus on Parkinson's disease research. Both original research papers and review papers are welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
