The Latest Research on Male Infertility

Message from the Guest Editors

According to the most recent estimates, one in 8 couples worldwide is affected by infertility. A male factor, alone or together with a female factor, can be recognized in about half of the cases, but in 30–40% of cases infertility remains unexplained. In addition to obvious reproductive consequences, infertility can hide even serious health problems that can negatively affect male well-being. Consequently, knowledge of the pathophysiology of male infertility plays a major role in scientific research. In this regard, the introduction of new genetic investigation techniques (such as next generation sequencing), the evolution of imaging tools, and improved laboratory techniques are valuable tools aimed at encouraging research and improving daily clinical practice. In this Special Issue, we invite authors to contribute with original research articles, reviews and meta-analyses examining the most up-to-date evidence available on pathogenesis, diagnosis, and treatment of male infertility.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
