

Special Issue

Thoracic Surgery: Current Practice and Future Directions

Message from the Guest Editor

In the last few years, thoracic surgery has been experiencing a tremendous development in terms of new technologies, and innovations in minimally invasive approaches and in integrated strategies for oncological treatments. This Special Issue aims to collect new evidence on the safety, efficacy and reproducibility of minimally invasive techniques, such as Uniportal-VATS and RATS, in lung, mediastinal and esophageal diseases. Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Current evidence on NSCLC pathogenesis, modern strategies for integrated treatment and future perspectives;
- Novel endoscopic diagnostic and therapeutic techniques in thoracic surgery;
- Minimally invasive thoracic surgery (VATS and RATS);
- New anesthesiology and pain management strategies in thoracic surgery.

I look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
