Targeted Diagnosis and Treatment of Maladaptive Developmental Trajectories and Psychopathological Manifestations in Children and Adolescents

Message from the Guest Editors

In recent years, a rapid and heterogeneous shift has been observed in the conduct of children and adolescents, which serves as an expression of their underlying distress. Various clinical and social factors can contribute to the distress experienced by children and adolescents, leading to the development of these conditions. For instance, children and adolescents who are unable to form and maintain healthy emotional relationships, self-regulate their emotional states and responses, participate in and contribute to a group, and be emotionally aware, empathic, and respectful of others will be less resourceful in social situations, more emotionally vulnerable, and more likely to develop both internalizing and externalizing social-emotional difficulties and clinical disorders. This phenomenon has become a growing concern worldwide as the mental health needs of young individuals continue to escalate. Join us as we try to identify risk and protective factors but also implement effective evidence-based medical and clinical interventions, adopting an interdisciplinary perspective.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
