Special Issue

New Clinical Advances in Aortic Valve Surgery

Message from the Guest Editors

In recent years, aortic valve surgery has undergone numerous and rapid changes. Although aortic valve replacement via median sternotomy remains the standard approach at many centers, new less invasive approaches via partial sternotomies or minithoracotomy are significantly increasing worldwide. These minimally invasive approaches guarantee less surgical trauma which generally translates into quicker recovery, shorter hospitalization times and lower costs. At the same time, the available portfolio of aortic prostheses has also evolved. New models of mechanical valves can now be used with lower INR levels, thus reducing the risks associated with anticoagulant drugs. Sutureless and rapid-deployment prostheses can be implanted with reduced aortic clamping and extracorporeal circulation times, while new chemical treatments are improving the durability of pericardial valves. At the same time, new surgical techniques to enlarge the aortic annulus allowing for the implantation of large-sized prosthesis have been developed. The Special Issue focuses on all aspects of operative and perioperative treatment modalities for minimally invasive aortic valve surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
