

Special Issue

Current Challenges in Orthopedic Trauma Surgery

Message from the Guest Editors

Orthopedic surgery focuses on the treatment of trauma, as it addresses a diverse range of intricacies related to fractures and soft tissue injuries, as well as always striving for better patient results. The goal of this Special Issue is to cover the latest research developments, clinical issues, and innovative efforts being made in this area. Advancements in surgical procedures, infection control, novel biomechanical fracture fixation devices, and postoperative rehabilitation are the main focus of this work. We welcome papers that cover a broad spectrum, including optimally adapted and other minimally invasive procedures, approaches to patient-specific treatment, and the optimization of surgical techniques and protocols, among others. This open Special Issue seeks to harness the collective skill of orthopedic trauma experts and clinicians to drive change and enhance practices for better health outcomes for patients across the globe.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
