Clinical Advances in Wound Healing and Inflammation Management

Message from the Guest Editor

In recent years, it has become clear that there is an important connection between wound healing and the inflammation process. Even though inflammation is a fundamental part of the healing process, unbalanced inflammation can also delay this process. Nutrition is also very important in managing inflammation and promoting wound healing.

Nowadays, many strategies are available to manage inflammation and promote wound healing. In this Special Issue, we will present the state of the art and innovative studies in order to create a strategy for the management of inflammation in both adults and children.

Topics of interest for this publication include, but are not limited to, the following:

- Wound healing and the inflammation process;
- Cytokines and cells involved in the wound healing process;
- Nutritional balance in the wound healing process;
- Acellular matrices for ulcers and burned patients;
- Technologies (NPWT; AWT; FLE; blue LED lamp treatments; photodynamic therapy with red light etc.);
- Regenerative medicine (fat grafting, PRP, mononuclear cell infiltration).

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
