Adult Lung Disease: Clinical Symptoms, Diagnosis, and Treatment

Message from the Guest Editor

At present, some common and rare lung diseases are well-defined, and others are almost unknown. The scientific community updates the guidelines, such as GINA or GOLD guidelines, almost every year to help clinicians in everyday practice. New evidence is emerging about the effectiveness of innovative treatments involving combinations of traditional drugs or small molecules, monoclonal antibodies, and bronchial electrotherapies; even nutraceuticals are used for long-term care. With this Special Issue, we aim to collect information to help clinicians care for their patients. Reviews and articles are welcome. We will collect crucial clinical observations on a single patient or small or large population data. We wish to collate scientific research on adult lung diseases regarding symptoms, objective manifestations, haematochemical and instrumental data, follow-ups, common and rare lung disease therapies, and possibly descriptions of new diseases or unusual signs/symptoms.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
