

## Special Issue

# New Insights in Paediatric Endocrinology

### Message from the Guest Editor

Pediatric endocrinology is a quickly evolving field, with incessant advances in our comprehension of endocrine disorders that influence growth, metabolism, and development in children. This Special Issue is aimed to highlighting the latest findings and clinical developments that are influencing the future of diagnosis, treatment, and long-term management of pediatric endocrine disorders. From innovative genetic discoveries to cutting-edge therapeutic advances, this compendium of articles will include an extensive spectrum of topics, covering growth disorders, obesity, diabetes, adrenal and pituitary abnormalities, thyroid dysfunctions, and puberty-related diseases. With the mounting application of precision medicine, innovative pharmacological strategies, and artificial intelligence, pediatric endocrinology is actually undergoing a crucial revolution that enriches both clinical outcomes and the affected children's quality of life. We look forward to attracting discussions and contributions that could better arrange the forthcoming pediatric endocrinology. For more information, please click [here](#).
