Advances in Obstructive Sleep Apnea Syndrome

Message from the Guest Editors

Obstructive sleep apnea (OSA) is the most common sleep-related breathing disorder, OSA might increase the risk of recurrent heart attack, stroke, and abnormal heartbeats, such as atrial fibrillation. OSA can cause metabolic dysregulation, endothelial dysfunction, systemic inflammation, oxidative stress and hypercoagulation, as well as neurohumoral changes. This Special Issue aims to highlight advances in the treatment of OSA; effective biomarkers of the pathogenesis, progression, and development of OSA; quality of life of people with OSA; and mechanisms linking diseases/disorders to OSA.

Guest Editors

Prof. Dr. Amir Sharafkhaneh

Dr. Masoud Sadeghi

Prof. Dr. Habibolah Khazaie

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
