

## Special Issue

# New Ablation Techniques for Atrial Fibrillation

### Message from the Guest Editor

Atrial fibrillation (AF) is the most common sustained arrhythmia worldwide. The catheter ablation (CA) of AF is progressively becoming the therapy of choice to establish rhythm control. Due to advances in technology and new ablation strategies, the efficacy and safety of CA are constantly improving. Currently, different energy sources, catheter designs and mapping systems provide a broad spectrum of options for the electrophysiologist. Despite rapid progress in this emerging field and worldwide consensus updates, evidence gaps persist at all points. The aim of this Special Issue is to provide a comprehensive overview of the advances in new ablation techniques for atrial fibrillation, with particular interest in the use of innovative techniques and technologies in the CA of AF. Researchers in the field of clinical arrhythmology and electrophysiology are encouraged to submit their findings as original articles or reviews to this Special Issue.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
