# Current Evidences and New Therapeutic Frontiers in Malignant Pleural Mesothelioma

### Message from the Guest Editors

As you know, malignant pleural mesothelioma (MPM) is a very rare aggressive cancer affecting an increasing number of people worldwide. This Special Issue the following goals: (1) To offer to the Readers an overview on the current therapeutic options in MPM; (2) To analyze the pathological features, genetic profile and biomolecular mechanism of MPM; (3) To report the new frontiers in the surgical and oncological treatment of MPM. In this sense, all submissions addressing all of the above highlighted aspects on MPM are welcome to this Special Issue. Thus, original articles, comprehensive reviews, and expert opinions are of the utmost interest, given the expansive scope of this area.
